Jackie Bower
Senior Manager,
Corporate Quality Services
Jeppesen Sanderson, Inc.
55 Inverness Drive East
Englewood, CO 80112-5498

Dear Mrs. Bower,

**TYPE I FAA LETTER OF ACCEPCANCE
OBSTACLE DATA
LOA0002DE**

The FAA has verified that Jeppesen Sanderson complies with AC 20-153A and RTCA/DO-200A with regards to your processing of obstacle data. The Type I LOA does not authorize Jeppesen Sanderson to supply obstacle data directly to an operator (e.g. end-user, airlines) for loading into the installed equipment.

The following terms and conditions are applicable to this letter of acceptance:

1. Jeppesen Sanderson receives data, such as Aeronautical Information Publications, from approved State sources. Data quality requirements for the receipt of data from other sources and for the delivery of data to their customers are defined in Jeppesen Sanderson's Obstacle Data Definition Document (DDD).
2. Jeppesen Sanderson's procedures for processing data are defined in departmental procedures that are compliant with Jeppesen's Corporate Quality Manual.
3. Jeppesen Sanderson must report data failures, malfunctions, and defects that may have a safety effect on the operational use of this data to the Denver Aircraft Certification Office – Mr. Michael Carlson, Project Engineer, ANM-100D, 26805 E. 68th Ave, Denver, CO 80249.
4. Jeppesen Sanderson must maintain a Quality Management System (QMS) as described in RTCA/DO-200A, section 2.5. Changes to the QMS that may affect the data quality objectives must be reported to the Denver Aircraft Certification Office – Mr. Michael Carlson, Project Engineer, ANM-100D, 26805 E. 68th Ave, Denver, CO 80249 before implementation.

5. Design Changes:

a. Jeppesen Sanderson must submit minor changes in the data quality requirements, data processing standards, or the quality management system to the Denver Aircraft Certification Office – Mr. Michael Carlson, Project Engineer, ANM-100D, 26805 E. 68th Ave, Denver, CO 80249 in accordance with procedures described within Jeppesen Sanderson’s QM Document Control Procedures and the Regulatory Change Communication Document. All other changes are considered major, and must be substantiated and accepted prior to implementation in the same manner as the original LOA.

b. Upon receipt of notification by the Denver Aircraft Certification Office that an unsafe condition exists in a database product supplied under this LOA, Jeppesen Sanderson shall develop corrective action and submit it to the Denver Aircraft Certification Office – Mr. Michael Carlson, Project Engineer, ANM-100D, 26805 E. 68th Ave, Denver, CO 80249 for approval. Jeppesen Sanderson shall expedite distribution of the approved corrective action to customers and users.

6. Jeppesen Sanderson must perform periodic internal audits as described in RTCA/DO-200A, section 3, with a maximum time between audits (whether total or incremental) of not more than one year. Any major non-conformance as described in RTCA/DO-200A, section 3.4 must be reported to the Denver Aircraft Certification Office – Mr. Michael Carlson, Project Engineer, ANM-100D, 26805 E. 68th Ave, Denver, CO 80249. Additionally, the FAA may perform periodic audits in accordance with procedures described within RTCA/DO-200A, section 3.
7. Jeppesen Sanderson must advise their customers of the status of their LOA as well as the status of LOAs (or foreign acceptance, including designation of the foreign authority that acknowledges the foreign source’s compliance to RTCA/DO-200A and the means of approval or acceptance) for all previous chain participants (up to, but not including, a State’s AIP). The method must be timely to ensure that customers can react to changes in the status of their LOA.

If further information concerning this project is needed, please contact Mr. Michael Carlson, Project Engineer of the Denver Aircraft Certification Office. Mr. Carlson can be reached at (303) 342-1092 or by email at michael.carlson@faa.gov.

Sincerely,

Todd Dixon, Manager
Denver Aircraft Certification Office
