COURSE CONTENT

International Flight Planning for Dispatchers provides students with the fundamentals of international flight operations, oceanic and polar flight planning, international aviation law and ICAO rules and regulations. Students become familiar with the procedures and equipment necessary to operate in different types of airspace, and how to plan a successful flight through the application of advanced flight planning techniques. This course is applicable to all flight planning systems, but does not include input instructions for specific flight planning engines.

WHO SHOULD ATTEND

If you are an experienced dispatcher or a flight operations officer who has been assigned or promoted to the international flight operations section of an AOC, this course is for you.

WHAT YOU WILL RECEIVE

A comprehensive package of training and reference materials; charts, maps and navigational information; a Jeppesen Academy organizer, and a Jeppesen graduation certificate.

AVAILABLE CLASSES

Courses are available at Jeppesen and partner training centers worldwide. View our online course locations for a facility near you. Courses may also be delivered at the customer facilities upon request. Contact us today for more information.

COURSE LENGTH

The Airspace Systems Workshop is a two or three day course, depending upon modules selected by the customer. See the course outline below for more details.
