

Jeppesen Military Chart Service

Challenge

Military missions demand aeronautical navigation charts from multiple sources, produced in multiple formats. Managing and updating the various charts and documents needed for an air force to execute global missions is a complicated, time consuming and costly task.

Solution

The Jeppesen Military Chart Service is a single repository for both navigation charts and text documents, in both electronic and paper formats. This service enables your entire organization to view and print charts from multiple sources, in multiple formats. For example, you have the ability to display electronic terminal approach and area charts that are produced by Jeppesen, and those produced by military and civilian agencies in standardized formats such as PDF, CADRG,

NOS/GEO, EZ Raster, RasterPlus and others. Text documents in .xml format can also be organized through this one easy to access, easy to manage charting service.

Charts and documents within our service can be accessed through several different methods, including:

- On a PC or laptop computer via Mission Ops eCharts Local
- Via any computer with an Internet connection via Mission Ops eCharts Online
- On the flight deck via the Jeppesen Electronic Flight Bag (EFB)
- Paper charts

The Jeppesen Military Chart Service is designed to allow you to migrate from paper, to less paper, to a fully digital operation, all at your own pace and within your own budget.

Mission Ops eCharts – The Application

Mission Ops eCharts is Jeppesen's innovative electronic charting solution designed specifically for military operators. Mission Ops eCharts offers the flexibility of both ground and airborne-based electronic charts. Ground services offer comprehensive and flexible chart viewing and printing options. The airborne service brings many features into the cockpit. Jeppesen chart applications are developed with a network-centric strategy, meaning information can be shared easily yet securely among large user groups.

Mission Ops eCharts Features

- Electronic display of over 42,000 Jeppesen terminal charts at over 6,000 IFR and 2,000 VFR airports worldwide
- Integration of terminal approach and area charts produced by military and civilian agencies

Jeppesen Military Chart Service

Mission Ops eCharts Features (continued)

- Filtering option to display only the information you require
- Robust printing options
- Integrates with Jeppesen flight planning and EFB
- Airway Manual® text pages in searchable .xml format
- Access to all charts through one application
- Capable of viewing charts from multiple sources, such as PDF, CDRG, NOS/GEO, EZ Raster, RasterPlus and others
- Update via Internet or CD ROM

Mission Ops eCharts Local

Mission Ops eCharts Local provides an intuitive graphical interface that enhances planning capabilities. Built-in planning tools simplify the identification and qualification of potential diversion aerodromes. Chart data is stored on the individual PC for off-line access and fast response times. Updates are downloaded via the Internet or updated via CD ROM. Jeppesen electronic charts are delivered in a highly compressed, vector-based file format to provide the highest quality. This application works with the Jeppesen Route Pack and can be shared between several Jeppesen products, such as flight planning and EFB.

Mission Ops eCharts Online

Mission Ops eCharts Online is a web-based delivery mechanism for your electronic charts. The application provides the same real-time information, delivered to any web-enabled computer and does not require any special software. The tool is ideal for users operating worldwide that require access in hotels, Fixed Base Operators (FBOs) and other remote staff. Headquarters staff, planners and others can easily access information on any aerodrome, worldwide.

Mission Ops eCharts Airborne

Mission Ops eCharts Airborne allows you to reduce paper on the flight deck, and have Jeppesen's comprehensive coverage available at the touch of a button. When the application is integrated into the Jeppesen EFB, you have constant access to your entire charting service, while taking advantage of the many other applications within the EFB.

Contact a Jeppesen representative today for more information on how the Jeppesen Military Chart Service can provide *any chart at any time for any user on any mission.*
