Fatigue Risk Management Seminar

Learn about current trends, the latest tools, and how to build an FRMS that makes a real difference to flight safety while allowing for efficiency.

Join us at this informative half-day seminar for Aviation, arranged by Jeppesen and Integrated Safety Support in Singapore, Monday the 16th of November.

Background
Regulators around the world are embracing a scientific approach to managing the risk of crew fatigue. Many of them are now passing on the ICAO recommendations to the operators, asking for implementation of fatigue risk management systems to complement, or even replace, traditional prescriptive flight and duty time limitations.

With a sound FRM approach, costs and complexity can be kept to a minimum. There may also be substantial benefits, not only from a higher level of flight safety, but from the released potential of increased crew productivity.

This FRM seminar will bring you up-to-date on regulatory work and the latest tools, and also demonstrate how a quantitative approach to crew fatigue and productivity can help your business.

Contents
The seminar will feature presentations by Jeppesen, Integrated Safety Support and industry fatigue risk management experts providing answers to the following:

- What is the latest science telling us?
- How will new regulations affect the industry?
- How can crew fatigue be quantified, and how to look at operational risk?
- What would a best-practice FRMS look like?
  - Safety Performance Indicators
  - Fatigue Safety Action Group
  - Tools
  - Predictive/Proactive/Reactive risk management
- What are the benefits of such an FRMS?
- How can you avoid introducing further complexity in your crew management processes?

Speakers
Adam Fletcher
Principal Consultant & CEO, Integrated Safety Support

Tomas Klemets
Head of Scheduling Safety, Jeppesen

Loukia Loukopoulou
Manager, Human Performance & Systems, Swiss International Air Lines

Who, when and where?
The seminar is primarily aimed at flight safety departments, flight standards staff and crew scheduling managers.

The FRM seminar will take place on Monday the 16th of November, 1.00 pm - 5.00 pm at the Grand Hyatt Singapore.

The seminar is free of charge. However a “no-show” fee of $100 will apply. To register, please click here.

For questions, please contact your Jeppesen Account Manager / Sales Executive or Tomas Klemets, Head of Scheduling Safety, on tomas.klemets@jeppesen.com.

We reserve the right to limit participation to two delegates per airline on a first come first serve basis if needed, since seating is limited. Registrations are received up until October 4th.
