

JeppView® Electronic Charts

Join the electronic age with Jeppesen JeppView electronic navigation charts. JeppView gives you everything you currently receive from our standard Airway Manual® and Europe VFR Manual®, but in an easier-to-use electronic format. You pick the coverage area and we supply airways, airports, nav aids, and approach plates—all electronically. And now that the FAA has approved AC 91-78 for pilots who operate under Part 91 to fly paperless by using Electronic Flight Bags (EFBs) and Electronic Chart Displays (ECDs). You can stop dragging that paper around and begin to reduce the weight and clutter in your cockpit. For detailed information on using electronic charts legally, please visit www.flyelectronic.net

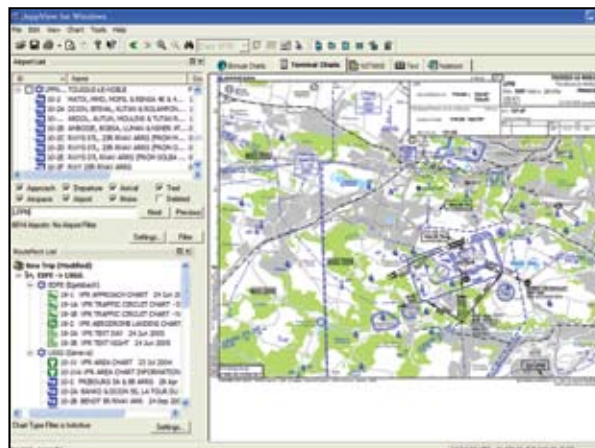

Navigation Charts Made Easy

- Full-color, high-quality, vector-based charts allow you to zoom in and out without loss of detail
- Optimized chart plan view based on flight experiences
- Everything from our standard Airway Manual IFR and Europe VFR Manual—approach charts, enroutes, even text
- IFR arrival and departure procedures, and European VFR terminal charts
- Airport diagrams
- Printable for use as backup
- XML technology supports easier and faster access to text information

Revisions Made Even Easier

- Electronic updates make it possible to make revisions in minutes, not hours
- Same information as contained on Jeppesen Airway Manual services and Europe VFR Manual
- Revisions available via the Internet anytime, anywhere
- Optional CD update every 14 days

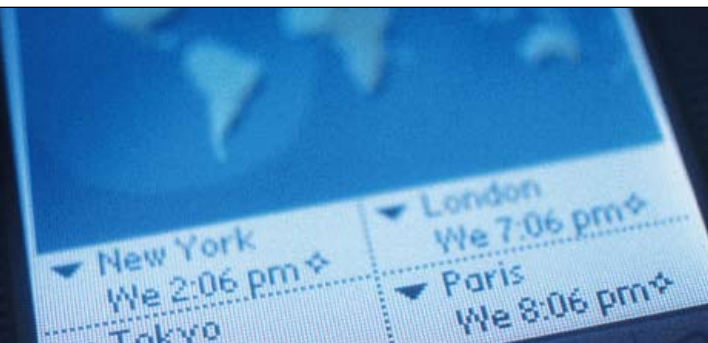

JeppView Electronic Charts

JeppView FliteDeck

- Moving map displays (GPS required)
- Made for airborne use with an optimized EFB interface, and customizable enroute charts. Selectable themes such as IFR high and low enroute, and European VFR
- Customizable IFR and European VFR approach charts
- Terrain profile lets you know what's below and in front of you at all times
- Next waypoint keeps you ahead of the airplane and ahead of your flight plan
- Nearest airport—always good to know even if you never need it
- Clipboard function for quick and comfortable access to preselected charts
- Trip time—nice to know most of the time, need to know sometimes
- Featuring XM® Wx Worx™ satellite weather in the cockpit, bringing you up-to-date weather right on your Jeppesen charts. (Service for US. 48 only)

Catch the Electronic Wave

Electronic navigation charts help reduce cockpit clutter and increase flying efficiency. They are easier to use, easier to store, and easier to revise than paper charts. They also weigh significantly less and take up less room in the cockpit. Electronic charts are the wave of the future. Catch the wave today with Jeppesen.
