

Marine Navigation Alert

Jeppesen MARINE NAVIGATION ALERTS contain significant information affecting Jeppesen Charts and/or Technology. They are regularly updated at www.jeppesen.com/marinealerts/

Date: October 10, 2012
Subject: Removal of Canadian charts from C-MAP by Jeppesen products (see Table 1 for a detailed list of charts removed)
Affected Products: **C-MAP NT, C-MAP NT+, C-MAP (iOS), C-MAP MAX, C-MAP MAX Pro, C-MAP 4D, C-MAP 4D EMBEDDED, C-MAP MAX EMBEDDED, C-MAP WORLDFOLIO (Passport Charts), C-MAP by Jeppesen MM3D** (see Table 2 at the end of this document for a detailed list of affected products)

Jeppesen would like to inform its customers operating in Canadian waters that per contractual requirements with the Canadian Hydrographic Service (CHS), Jeppesen has removed select charts from its products which were derived from official CHS paper charts.

The Canadian Hydrographic Service (CHS) considers these charts inadequate for conversion to digital format, and for use in digital navigation systems (including GPS Chart Plotters).

To minimize the impact of this change, areas where charts were removed have been covered with smaller scale charts, whenever possible.

As a consequence of removing these charts, Jeppesen has discontinued a number of cartridge codes (see the list of affected cartridges below). Jeppesen customers in possession of the following cartridges won't be able to update their products until further notice:

C-MAP NT+: M-NA-C126.31, M-NA-C152.31, M-NA-C176.31, M-NA-C178.31, M-NA-C179.31, M-NA-C209.31, M-NA-C210.31, M-NA-C217.31, M-NA-C218.31, M-NA-C219.31, M-NA-C221.31, M-NA-C222.31, M-NA-C250.31

C-MAP MAX: M-NA-M048.21, M-NA-M176.21, M-NA-M178.21, M-NA-M179.21, M-NA-M209.21, M-NA-M210.21, M-NA-M217.21, M-NA-M218.21, M-NA-M219.21, M-NA-M250.21, M-NA-M330.21

C-MAP 4D: M-NA-D048.08, M-NA-D176.08, M-NA-D178.08, M-NA-D179.08, M-NA-D209.08, M-NA-D210.08, M-NA-D217.08, M-NA-D218.08, M-NA-D219.08, M-NA-D250.08, M-NA-D330.08

iOS: M-NA-I048.08

Jeppesen will continue to work with CHS to provide high quality chart coverage as soon as possible. As a result of such collaboration, CHS charts 3312 and 3313 have been reinstated in the Strait of Georgia.

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, www.jeppesen.com/marinealerts/. Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.

Marine Navigation Alert

Additional Information

Jeppesen Marine reminds navigators that nautical chart information is constantly changing.

National Hydrographic authorities periodically publish new and updated information and when received, Jeppesen Marine incorporates the updated information into new and existing products. These changes are available to our customers for purchase.

Therefore, navigators should check their Jeppesen Marine chart products to make sure they have the most current version available. If your charts are out-of-date, Jeppesen Marine strongly urges you to update them via Jeppesen Marine directly, or through authorized resellers.

Jeppesen Marine electronic charts are an aid to navigation designed to supplement, but not replace, the use of authorized government charts and publications, including *Notices to Mariners*.

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, www.jeppesen.com/marinealerts/. Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, www.jeppesen.com/marinealerts/. Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.

Table 2. List of affected C-MAP by Jeppesen products

Use the following table to determine if you are in possession of product databases affected by this notice, as well as to find out the release date of updates to each affected product.

Please note that the list for MM3D shows the last release of products NOT AFFECTED by this removal, i.e. all the next releases will report that changes until further notice.
