Marine Navigation Alert

Jeppesen MARINE NAVIGATION ALERTS contain significant information affecting Jeppesen Charts and/or Technology. They are regularly updated at www.jeppesen.com/marinealerts/

Date: February 6, 2009
Subject: Incorrect chart georeference. Chart TEXA 001
Seabrook Shipyard, Galveston Bay, Texas, USA
Affected Products: C-MAP MAX, C-MAP NT+, C-MAP MAX/NT+/PC SELECTOR, C-MAP NT, C-MAP MAXPRO (see Table 1 at the end of this document for a detailed list of affected cartridges and databases, as well as for corrected versions and their release dates)

Jeppesen wishes to alert customers that its chart TEXA 001 covering the area around Seabrook Shipyard, Galveston Bay, Texas, USA, contained in the Jeppesen Marine products described above is incorrectly georeferenced. This error will be corrected in the next release of each affected product.

Jeppesen strongly urges navigators planning to sail in the affected area to exercise extra caution and to update their charting product to the latest version, as soon it is available.

Marine Data Alerts are published to inform users of significant issues in Jeppesen navigation data which may affect marine operations or safety. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Alerts are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, www.jeppesen.com/marinealerts/. Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.

Users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.

JEPPESEN.

Marine Navigation Alert

To find the code of your cartridge look at the label on the front face of the cartridge – see yellow highlighted area in picture.

If you are using C-MAP MAX/NT+/PC SELECTOR charts on CD-ROM run the Selector program and go to the Shopping Cart page to see if you have purchased one of the areas listed above.

Additional Information

Jeppesen Marine reminds navigators that nautical chart information is constantly changing.

National Hydrographic Authorities periodically publish new and updated information. As it is received, Jeppesen Marine incorporates the updated information into new and existing products. These changes are available to our customers for purchase.

Therefore, navigators should check their Jeppesen Marine charting products to make sure that they have the most current version available. If your charts are out-of-date, Jeppesen Marine strongly urges you to update them via Jeppesen Marine directly, or through authorized resellers.

Jeppesen electronic charts are an aid to navigation designed to supplement, but not replace, the use of authorized government charts and Notices to Mariners.

Marine Data Alerts are published to inform users of significant issues in Jeppesen navigation data which may affect marine operations or safety. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen.
