

# JEPPESEN.

## *Marine Navigation Alert*

**Jeppesen MARINE NAVIGATION ALERTS contain significant information affecting Jeppesen Charts and/or Technology. They are regularly updated at [www.jeppesen.com/marinealerts/](http://www.jeppesen.com/marinealerts/)**

**Date:** October 6, 2011

**Subject:** Missing dangerous rock awash on Jeppesen products, covering Rosario Strait Southern Part.

**Affected Products:** C-MAP NT, C-MAP NT+, IOS, C-MAP MAX, C-MAP MAX Pro, C-MAP 4D, EMBEDDED CHARTS FOR STANDARD HORIZON PLOTTERS, WORLDFOLIO, (see *Table 1 at the end of this document for a detailed list of affected products*)

Jeppesen hereby notifies customers that the Jeppesen products listed above are missing a dangerous rock awash at position 48° 27' 01.100"N, 122° 47' 36.700"W, in chart 22-04960 covering Rosario Strait Southern Part, USA at 1:25000 scale. This object is, however, visible on charts of greater scale included in these products. This information should be taken into account for safe navigation in the area. The originator of the source data has been notified, since the rock awash was also found missing from the original source hydrographic data and a Local Notice to Mariners has been published. Jeppesen and the source originator have taken steps to include this object in future product and data releases.

Customers should also refer to NOAA Local Notice to Mariners LNM 38/11 13<sup>th</sup> Dist for chart 18429, Rosario Strait Southern Part for additional details.

Jeppesen recommends that customers using the affected products update their navigational database to the next version as soon as it becomes available. Release dates of corrected Jeppesen products are provided in Table 1 at the end of this document.

### **Additional Information**

---

Jeppesen Marine reminds navigators that nautical chart information is constantly changing.

National Hydrographic Authorities periodically publish new and updated information. As it is received, Jeppesen Marine incorporates the updated information into new and existing products. These changes are available to our customers for purchase.

Therefore, navigators should check their Jeppesen Marine charting products to make sure that they have the most current version available. If your charts are out-of-date, Jeppesen Marine strongly urges you to update them via Jeppesen Marine directly, or through authorized resellers.

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, [www.jeppesen.com/marinealerts/](http://www.jeppesen.com/marinealerts/). Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.

# **JEPPESEN.**

## *Marine Navigation Alert*

Jeppesen electronic charts are an aid to navigation designed to supplement, but not replace, the use of authorized government charts and Notices to Mariners.

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, [www.jeppesen.com/marinealerts/](http://www.jeppesen.com/marinealerts/). Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.

ZR904.52	ZR904.58	Oct-12

Marine Product Change Notices are published to inform users of errors in Jeppesen navigation products. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Notices are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, [www.jeppesen.com/marinealerts/](http://www.jeppesen.com/marinealerts/). Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Notice.
