

Jeppesen FliteDeck Pro 4.0

Reliable. Robust. Innovative.

Jeppesen FliteDeck Pro is the airline industry's leading mobile app, providing pilots with all aeronautical maps, charts, manuals and documents needed for paperless flying. It is the preferred navigation solution for airlines aiming to minimize operational interruptions.

Here are some of the capabilities FliteDeck Pro 4.0 offers:

- ✔ **Weather Layers**, provided by The Weather Company, contribute to improved flight safety and operational efficiency by enabling flight deck crew to make better decisions based on better weather information depicted on their enroute map.
- ✔ **Background Updates** reduce airline data transfer and 4G costs up to 80% by minimizing data volume and time needed to update mobile devices. Pilots optimize worktime as briefings are uninterrupted by background updates.
- ✔ **In-App NOTAMs** give pilots access to state-sourced airport and enroute NOTAMs pertaining to the selected terminal chart or map. Easy-to-identify, category-based iconography and in-app filtering expedite existing briefing processes and support safer airline operations.
- ✔ **SmartNotes** cut through the clutter to intelligently deliver pertinent flight information based on chronological and geospatial data, and minimize pilot interactions with the mobile device.
- ✔ **Tailored Enroute** allows you to supplement Jeppesen's dynamic enroute data with your own operationally specific and relevant data.
- ✔ **Airport Moving Maps** improve pilot situational awareness during ground movements at airports through an ownship symbol depicted on detailed, dynamically rendered airport maps.
- ✔ **Aircraft Connectivity** through the industry's most popular Aircraft Interface Devices (AIDs) assures FliteDeck Pro users fully benefit from new EFB enhancements and accurate ownship depiction.

FliteDeck Pro is backed by more than 80 years of Jeppesen trust and reliability. We'll be with you every step of the way, 24/7, to assist your operation with guidance and support, wherever and whenever needed.

Additional capabilities include:

- ✔ Aircraft Interface Device (AID) integration with Boeing ONS, Teledyne, CMC and Freeflight ADS-B
- ✔ Dynamic, data-driven maps in the airport and enroute phases
- ✔ Fast rendering capabilities
- ✔ Low storage-space requirements
- ✔ Import and interlace company charts with Jeppesen charts and access them from a single point

Jeppesen FliteDeck Pro 4.0

- ✔ Add pertinent charts to chart clip for easy reference
- ✔ Highlight, mark or add notes to charts and documents as needed
- ✔ Quickly import routes through a flight plan route integration
- ✔ Find enroute distances fast with a graphical in map ruler or automatically calculate off map position distance
- ✔ Tap route objects to display more information, or drag and drop to edit route.
- ✔ SID and STAR selector visually displays filtered procedures as they intersect with your route in a map overview
- ✔ Share route with the Jeppesen Aviator EFB
- ✔ Easily add user waypoints and alternative airports
- ✔ Support of VFR operations with VFR and cultural data layer*
- ✔ Render SIDs and STARs directly on the enroute map
- ✔ One-tap access to engine out charts
- ✔ Touch access runway information, such as heading, displaced threshold, lighting and TDZ elevation.
- ✔ Print paper back-ups of terminal charts on demand.

Why FliteDeck Pro?

- ✔ FliteDeck Pro is the most reliable mobile app available with the accuracy found only in Jeppesen maps and charts.
- ✔ Minimize operational interruptions with backup redundancies like “Trip Kit”, which gives you a safety net for getting navigational information to pilots in the event of network, hardware or connectivity issues.
- ✔ Receive access to industry-leading ground tools such as Jeppesen Distribution Manager (JDM) Pro and Jeppesen Ground Controls for secure and easy content management and distribution

We can help you go mobile.

- ✔ Our world class team of dedicated professional services experts can help you every step along the way—from initial business case to implementation and training.
- ✔ We also offer an extensive library of training resources to get your pilots ready to fly as quickly as possible, and without the heavy flight bags.

*Coverage for contiguous United States and select parts of Europe.

System Requirements

FliteDeck Pro 4.0

- ✔ iPad running iOS v11.1 or higher
- ✔ Recommend iPad Air 2 or higher
